RE: York County School of Technology
CRA Project No. 1554

Dear Mr. Eichelberger:

As we move past the first half of the construction phase at the York County School of Technology, I wanted to take this opportunity to bring to your attention not only the quality of the construction in the area completed to date, but more importantly the management team's exemplary delivery of construction services for this project.

Under the leadership of Project Manager - Frank Eichelberger, General Superintendent - Rich Marchi and Superintendent - Randy Groff, this project has proceeded and continues to proceed as an exemplary project of how to manage a most difficult construction project.

The safety created by a clean coordinated job site by your safety-conscious management team has been noticed and commented on by all members of our staff who have visited the site since the start of construction. The flow of paperwork for submission, approvals and payment requisitions continues to be accurate and submitted in a timely manner.

All of us on the design team at Crabtree, Rohrbaugh & Associates look forward to continuing our joint effort in bringing this very important educational facility to a successful completion.

Again, please extend my heartfelt appreciation to your team for the leadership and management skills they continue to bring to this project.

Sincerely,

CRABTREE, ROHRBAUGH & ASSOCIATES

Sean Flanagan
Project Manager
