To whom it may concern:

During the past two years the Canton Area School District's high school building has undergone a total renovation. Lobar Inc. was our general contractor.

This letter is intended to compliment Lobar on their fine performance on our behalf. We are very satisfied with our finished result, a handsome and extremely functional high school. Our project started late but was finished two months ahead of schedule. This was accomplished as Lobar changed our phasing schedule. We witnessed a much more aggressive construction pace. Moving our project along quickly and smoothly while better separating our classrooms from major construction.

Rick Lehman our project superintendent continually motivated the prime contractors and sub contractors. His efforts proved to be the difference and driving force as we obtained our goals. The problems and troubles that come with commercial construction were handled quickly and efficiently. I as the Canton Area School District's representative compliment his performance.

The Canton Area School District will recommend Lobar as a very competent general construction company. I would not hesitate to contract Lobar for any future general construction needs.

Dann Lepper
Maintenance Supervisor
Canton Area School District
