Frank,

It's always good to get the last of the paperwork out of the way. One set of "As-built" drawings for Dan and Jerry's files is fine.

All of our objectives have been met and the new facility is something we're all proud to have available to meet all our future endeavors. We are very pleased with the end result. Thank you and all your people at Lobar for their efforts. I don't know if all projects have the problems we encountered with the local authorities and government bureaucrats but each time we crossed one of their hurdles it felt like a major achievement was made. It was to say the least, eye opening. Lobar was never one of our hurdles and was always extremely helpful in helping solve issues that came up.

We will be having a grand opening some time this spring and I hope all your key people will be able to come have a bite and toast the new facility. We'll be in touch.

Thanks for all of us at A.G. Mauro

Jerry Miles
