Re: Utilities Employees Credit Union
New 55,000 sq.ft. Office Building

Dear Richard:

As you are aware, the new office building project for the Utilities Employees Credit Union has come to a successful conclusion. I would like to express my appreciation to you and your staff for your efforts, during the construction phase, to complete this project to the satisfaction of all the design team members, including the Owner, Consulting Engineers and Architect.

Due to the efforts of Lobar, Inc., the project was completed on time and within budget, while maintaining good workmanship. Change orders were kept to a minimum and Lobar, Inc. was quite willing to negotiate fair and reasonable prices for all project changes.

We realize there were some behind-the-scenes staff members working on the project, however, please extend my special thank you to the following Lobar, Inc. staff members who I had contact with on nearly a daily basis: Tony Larson, Project Manager; Ryan Rupp, Site Superintendent; and Mike Stewart, Assistant Project Manager. Their cooperation, problem-solving abilities, and professionalism was greatly appreciated by the Owner and Architect.

We look forward to working with you on future construction projects.

Very truly yours,

MUHLENBERG GREENE ARCHITECTS, LTD.

James E. Dockey, AIA
Project Architect
